

Please keep K-Love on an FM translator. It would be such a great loss to lose the signal. There is more and more filth coming thru our airwaves that we are grateful for stations such as K-love that allow for the whole family to listen w/peace of mind. My teenagers and their friends have started to listen and I've seen many positive changes taking place as a result. They are telling others about it. It can only be a positive impact that overflows into the community.
Thank You
